## PDPM | Patient Driven Payment Model.

Is the proposed new Medicare payment rule for (SNF's) skilled nursing facilities. It will replace the current RUG-IV system with a new way of coding and calculating reimbursement. Under PDPM, therapy minutes will be removed as the basis for payment and the focus will be on the resident as a whole and to carefully manage how services are delivered in order to provide just the right level of care for each resident. PDPM will assign every resident a case-mix classification that then will drive the daily reimbursement rate for that individual.

## HyMark Solutions is here to help you get prepared.

1

Understand the requirements of PDPM

2

Identify the differences between PDPM and RUG-IV

3

Determine how therapy and MDS departments will be impacted

4

Establish strategies for transitioning from RUG-IV to PDPM
