# Hello to Our New Subscribers & Clients

the HyMark Team Welcomes You

Leverage your EHR Scorecard for Optimization.

Friends!

Built into your PointClickCare® database is a powerful tool that aggregates your resident data and delivers reports, dashboards and (with our guidance) the ability to quickly identify areas in which your organization can streamline processes and maximize reimbursement. Intrigued? Contact us to schedule a 60-90 minute web meeting and we will walk you through this wonderful tool! Best of all, this service is FREE!

Our Monthly Trainings.

Offered by our team of clinical and financial specialist.

Our team of Clinical and Financial Specialists offer trainings each month on all things PointClickCare®. This month, as mentioned above, is on clean up of dashboards, assessments, orders and records. But we are also offering trainings on eMAR, clincal & financial Q&A, POC, and skin & wound,.

We are here for you; if one of our training dates or times doesn't work for you, message our team and we will dp our best to accommodate you

Did You Know?

About PointClickCare's® ChartPic app? Compatible with all apple products, this app allows care providers to capture residents photos for identification purposes.

How it works: once the image has been uploaded it will automatically be updated in all areas of the PointClickCare® EHR including the web application, POC and eMAR. This seamless integration helps save staff time and allows them to focus on what matter most - providing personalized care. This app is intended to integrate with the PointClickCare EHR platform. If you are not a current PointClickCare client, but would like this solution, we suggest you contact PointClickCare .

KEY BENEFITS INCLUDE:
-The ability to share a secure photo/image with a secure message
-The ability to easily verify a residents identification when they are unable to communicate
